

Spot-Spitter® Downspray

Minimize Overspray in Small Containers

The Primerus Products Spot-Spitter Downspray improves on the performance of the traditional Roberts Spot-Spitter in small container applications where minimal overspray is critical.

The Downspray's patented splash plate is curved in two dimensions to direct the spray downward toward the soil instead of outward against the container wall. The result is a more uniform pattern around the root zone with minimal waste.

Also unique to the Spot-Spitter DS, a patented U-Groove reduces the impact of tubing properties on the shape of the spray pattern.

The DS is manufactured from the same tough, UV stabilized acetal material as the original Spot-Spitter which has led in nursery applications since 1967. It also uses the same color-coded flow rates and patterns as the original Spitter, minimizing confusion and allowing easy interchange between products.

Irrigate your small container nursery crops with an enhanced version of the trusted industry leader. Use the Spot-Spitter Downspray. Primerus Products, LLC is dedicated to supplying product solutions to nursery growing applications. Visit us at PrimerusProducts.com or contact us at 1-855-SPITTER (1-855-774-8837).

The Spot-Spitter DS uses a patented flow passage and splash plate to irrigate small container plants with optimal uniformity and little or no overspray.

PRIMERUS PRODUCTS, LLC

Use the Spot-Spitter DS to improve uniformity and minimize overspray in your small container applications. The DS is available with the same color coded flow rates and patterns as the Spot-Spitter AG, with the enhancement of a downward directed stream. For more information, visit us at PrimerusProducts.com or contact us at 1-855-SPITTER (1-855-774-8837).

Part #	Product Description	STANDARD			METRIC			Usage
		PSI	GPM	GPH	BAR	LPM	LPH
