

# SPOT-SPITTER® TALL

*Tall, Strong and Stable*

The Spot-Spitter Tall is the world's largest irrigation spray stake, standing a full 11.5 inches from bottom to top. Its unique size translates to rock-solid stability in light media, giving the ultimate in uniformity and reliability.

The Tall is manufactured using the same bullet-proof design, UV stabilized materials and color-coded flow rates as the time-tested Roberts Spot-Spitter AG but is super-sized for large containers or light media. In addition to enhanced stability, the Tall also allows you to set the height of the spray head up to 7" above the media for wider patterns.

The Spot-Spitter Tall is a premium watering solution for your most valuable container stock. Its pattern covers your entire container without overspray, and a shutoff peg allows you to turn flow off when you sell your plants. The result is better root development, water savings and accurate delivery of nutrients in large containers.

Primerus Products, LLC is dedicated to supplying product solutions to nursery growing applications. Visit us at [PrimerusProducts.com](http://PrimerusProducts.com) or contact us at 1-855-SPITTER (855-774-8837).

**Premium resins and high loadings of antioxidant and carbon black ensure years of trouble-free operation. Use Primerus supply tubing for lower installation cost and peace of mind.**

# PRIMERUS PRODUCTS, LLC

The Spot-Spitter Tall starts with one of the world's most reliable and respected irrigation products and super-sizes it. The results are:

- **Uniform spray over entire container**
- **High flow rates for short sets**
- **Convenient shut-off mechanism**
- **Stability in light media**
- **Adjustable height above surface**
- **Unmatched strength and UV resistance**

Use the Tall to irrigate your large containers for the best possible growing conditions.

For even greater stability, and preset spray height, use the Primerus Stabilizer Plate with the Tall. The Stabilizer snaps the spray into preset heights of 3", 5" or 7" above ground, and provides unparalleled stability in light media.

Use the Primerus Stabilizer Plate for unparalleled stability in light media and uniform spray height for all of your containers
