

SUPPLY TUBING

Flexible – Strong – Dependable

Flexible, strong and dependable, Primerus supply tubing is a must for optimum operation of the SPOT-SPITTER®, and an excellent choice as a general purpose polyethylene supply tube. Primerus tubing is available in 1/8" (.125" ID x .187 OD) and 3/16" (.170" ID x .250" OD) sizes, and both 100-foot and 1000-foot rolls.

Primerus tubing is manufactured using premium broad molecular weight polyethylene resins which provide enough flexibility to form a water-tight seal with or without fittings or barbs. Heavy loadings of antioxidants and carbon black protect the polyethylene matrix from heat and UV, ensuring years of trouble-free use.

Primerus 1/8" tubing (TPE-12531-100 or TPE-12531-1000), also referred to as Spaghetti Tubing, brings water from a supply lateral to the SPOT-SPITTER head or other 1/8" watering device. Cut one end at 90° to insert on the SPOT-SPITTER and

the other end at 45° to form a sharp point to press into a punched Polyethylene lateral. See **SPOT-SPITTER Installation Instructions** for more details.

Primerus 3/16" is a premium general purpose supply tube for use with micro sprinklers, micro sprayers or drippers. The same material properties that make 1/8" tubing ideal for the SPITTER make the 3/16" tubing a good choice for other devices. The strong but flexible material works easily and reliably with barbs and other fittings, and its strength and durability mean that it only needs to be installed once. **Primerus 3/16" tubing is not for use with the SPOT-SPITTER.**

Use Primerus tubing in your nursery or landscape applications for lower installation cost and peace of mind. Primerus Products, LLC is dedicated to supplying product solutions to nursery growing applications. Visit us at PrimerusProducts.com or contact us at 1-855-SPITTER (1-855-774-8837).

Premium resins and high loadings of antioxidant and carbon black ensure years of trouble-free operation. Use Primerus supply tubing for lower installation cost and peace of mind.

SPOT-SPITTER is a registered trademark of Primerus Products, LLC.

PRIMERUS PRODUCTS, LLC

Primerus supply tubing is manufactured using the same resin blend originally developed by Roberts Irrigation Products for the SPOT-SPITTER product line. Decades of service have proven the reliability of this blend for all micro-irrigation applications.

Detailed specifications and quality control processes ensure that every foot of Primerus tubing has the same properties and dimensions. At Primerus we take pride in our attention to detail and our commitment to high quality manufacturing.

For more information on the use of Primerus 1/8" Spaghetti tubing with SPOT-SPITTER products, see **SPOT-SPITTER Installation Instructions** in the Downloads section of our website or call us at 1-855-SPITTER (1-855-774-8837) for a copy.

Cut 1/8" supply tube at 45° on one end and 90° on the other for easy, leak-free connection of a SPITTER to a lateral without barbs or fittings.
