

# PVC BUTTERFLY VALVES

*Total Corrosion Resistance*

Primerus Butterfly Valves and True Union Ball Valves are manufactured by CEPEX, a global supplier with an extensive track record in US farming and nursery applications. The CEPEX butterfly valve is a premium product offering total corrosion resistance at a competitive price that was designed for agriculture.

Conventional metal butterfly valves can economically control large flow volumes but they all share the same drawback: given enough time, they will corrode and become difficult to turn. This is as true for basic metal valve packages as it is for expensive upgrades with stainless components. And the time it takes to corrode is accelerated by the harsh chemicals used in farms and nurseries.

The CEPEX butterfly valve solves the corrosion problem by avoiding metal altogether. All

components of the CEPEX valve that make contact with fluid flow are made from either PVC plastic or EPDM rubber. No metal contacts the fluid flow whatsoever. Even among more expensive PVC butterfly valves made by other manufacturers, CEPEX is unique in this regard. The zinc plated steel shaft in CEPEX valve is completely isolated from the fluid flow.

CEPEX butterfly valves are ideal for your high-end nursery applications. Spanning a range from 2" to 10", the line includes the right part for your operation, regardless of size.

Primerus Products, LLC is dedicated to supplying product solutions to progressive nursery growers. Visit us at [PrimerusProducts.com](http://PrimerusProducts.com) or contact us at 1-855-SPITTER (1-855-774-8837).

**No metal parts come into contact with fluid flow, completely avoiding the most common problem with conventional valves: restricted motion due to corrosion.**

# PVC BUTTERFLY VALVES

*Total Corrosion Resistance*

Fig.	Part	Material
1	Body	PVC
2	Valve Disc	PVC
3	Rubber Seal	EPDM
4	Stem	Zinc Plated Steel
5	O-Ring Seal	EPDM
6	Top Bearing	Glass Filled PP
7	Throttle Plate	Acetal
8	Lever Lock	Acetal
9	Handle	Glass Filled PP

The CEPEX PVC butterfly valve is the only butterfly valve with both the long life and affordable pricing that are practical for nursery use. Refer to the tables on this page for ordering information and a basic parts list.
